**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yamamoto (US 5,557,665; cited and applied for the first time).

The entire patent to Yamamoto plainly teaches the invention of claims 1-20 for sharing telephone devices (read as the desk sharing). Yamamoto teaches transferring full user identity and feature functionality from a dedicated telephone device to a shared telephone device. Yamamoto teaches executing a desk sharing application via the TELEPHONE SERVICE EXECUTING DEVICE (505) in FIG. 1; reserving an available shared telephone device via REGISTER TELEPHONE TERMINAL DATA (S3e) in FIG. 8; automatically transferring the full user identity and feature functionality via CHECK TELEPHONE TERMINAL DATA CORRESPONDING TO ID CODE (S56) FIG. 10; and clearly makes the distinction between dedicated telephone devices (reads on the own telephone terminal) and shared telephone devices at column 1, lines 32 – 37. The claimed Enterprise Communication Platform reads on the entire system depicted in FIG. 1 of Yamamoto.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee et al., Gruchala et al, and Mayer et al. all teach aspects for transferring full user identity and feature functionality between telephone devices.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/610,451. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are broader in scope than the claims of the '451 application. Omission of an element and its function in a combination is an obvious expedient if the remaining elements perform the same functions as before. *In re KARLSON* (CCPA) 136 USPQ 184 (1963).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
